

Component	Purpose
<b>FormInput.jsx</b>	A reusable styled <code>&lt;input&gt;</code> component (text, password, email, etc.)
<b>FormTextarea.jsx</b>	A reusable <code>&lt;textarea&gt;</code> for thoughtText or comments.
<b>FormButton.jsx</b>	A reusable <code>&lt;button&gt;</code> for Submit / Save / Delete.
<b>UserCard.jsx</b>	Display a user's profile snippet (username, email, maybe friend count).
<b>ThoughtCard.jsx</b>	Display a single thought (text, reactions, author, timestamp).
<b>ReactionList.jsx</b>	List all reactions under a Thought.
<b>ProtectedRoute.jsx</b>	Wrapper component to block pages unless user is logged in (based on token).
<b>LoadingSpinner.jsx</b>	Nice loading spinner while waiting for API calls.
<b>ErrorMessage.jsx</b>	Nicely styled error display box for catching API errors.
<b>Navbar.jsx</b>	Navigation bar with Login/Logout, Profile, Home links.
<b>PageWrapper.jsx</b>	Layout wrapper that applies consistent spacing/padding across pages.
<b>Modal.jsx</b> (optional)	Popups for delete confirmation, editing thoughts, etc.
