

Page Component	Purpose
<b>Home.jsx</b>	Public landing page — maybe shows a welcome, latest public Thoughts, or a "Join us!" button.
<b>Login.jsx</b>	Login form page — uses your <code>authAPI.jsx</code> to authenticate users.
<b>Signup.jsx</b> <i>(optional for MVP)</i>	If you allow users to register (sign up themselves).
<b>Dashboard.jsx</b>	After login — shows user's Thoughts, "Create new Thought", list of Friends, etc.
<b>AllThoughts.jsx</b>	Public or authenticated list of all Thoughts posted by users.
<b>SingleThought.jsx</b>	View a full single Thought by ID, along with its Reactions (and option to add Reaction).
<b>CreateThought.jsx</b>	Form to create a new Thought (probably part of Dashboard, or its own page).
<b>EditThought.jsx</b> <i>(optional)</i>	If users can edit their old Thoughts.
<b>UserProfile.jsx</b>	A specific user's profile — their username, bio (if added later), their Thoughts, friend list.
<b>FriendsList.jsx</b> <i>(optional inside Dashboard/Profile)</i>	Display user's friends, maybe link to their profiles.
<b>NotFound.jsx</b>	404 Page for wrong URLs — simple "Page not found" message.
